# Luxurious timber look, now longer and wider

New hardwood vinyl planks have just arrived

Quick and easy to install

Skyline can be fitted over most existing hard floors as soon as your subfloor is dry, smooth, dust free and in sound condition.

Durable and adaptable

Skyline is easy to cut to size, locks securely into place and lays perfectly over any flooring surface. Its sturdiness and flexibility ensure the longevity of your flooring for years to come.

Antibacterial properties

Skyline planks are coated with colourless Ag+ nano sized silver ion particles, resulting in an anti-bacterial armour. Silver inhibits the growth of bacteria by deactivating bacteria's oxygen metabolising enzymes, which means safer flooring for you and your family.

Easy to repair

Skyline is designed for easy replacement. Should a plank get damaged it can easily be lifted and replaced with a new one.

Authentic timber feel

Skyline is a premium and elegant option with a realistic wood look.

100% Water resistant

Skyline is 100% water resistant, making it an ideal solution for all commercial and domestic environments which may experience frequent spills or wet areas.

Tested at temperatures of up to 80°C

Skyline planks have been tested at temperatures between 70°C to 80°C for over 2 years.

Retains heat

Skyline is softer and warmer underfoot than natural wood and stone flooring.

Quiet acoustic qualities

Skyline is perfect for when you want to reduce noise levels in rooms such as playrooms, bedrooms and garage/loft conversions, without the need for an underlay.

Low maintenance

Skyline planks are simple to care for. All that's required is a quick sweep and a mop with warm water.
